

- 10 History of the automobile**
- 10 Development history
- 12 Pioneers of automotive technology
- 14 Robert Bosch's life's work

- 16 Basics of the gasoline (SI) engine**
- 16 Method of operation
- 20 Cylinder charge
- 24 Torque and power
- 26 Engine efficiency
- 28 Specific fuel consumption
- 30 Combustion knock

- 32 Fuels**
- 32 Fuels for spark-ignition engines (gasoline)
- 37 Alternative fuels

- 40 Cylinder-charge control systems**
- 40 Electronic throttle control (ETC)
- 44 Variable valve timing
- 47 Dynamic supercharging
- 50 Mechanical supercharging
- 52 Exhaust-gas turbocharging
- 55 Intercooling
- 56 Controlled charge flow
- 57 Exhaust-gas recirculation (EGR)

- 58 Gasoline injection systems over the years**
- 58 Overview
- 60 Beginnings of mixture formation
- 68 Evolution of gasoline injection systems

- 84 Fuel supply**
- 84 Fuel delivery with manifold injection
- 86 Fuel delivery with gasoline direct injection
- 87 Evaporative-emissions control system

- 88 Electric fuel pump
- 91 Gasoline filter
- 93 High-pressure pumps for gasoline direct injection
- 100 Fuel rail
- 101 Pressure-control valve
- 101 Pressure-limiting valve
- 102 Fuel-pressure regulator
- 103 Fuel-pressure damper

- 104 Manifold fuel injection**
- 104 Overview
- 105 Method of operation
- 108 Instants of injection
- 109 Mixture formation
- 113 Ignition of homogeneous air/fuel mixtures
- 114 Electromagnetic fuel injectors

- 118 Gasoline direct injection**
- 118 Overview
- 118 Method of operation
- 119 Combustion process
- 122 Operating modes
- 125 Mixture formation
- 127 Ignition
- 128 High-pressure injector

- 130 Operation of gasoline engines on natural gas**
- 130 Overview
- 132 Design and method of operation
- 133 Mixture formation
- 135 Natural gas injector NGI2
- 138 Natural-gas rail
- 138 Combined natural-gas pressure and temperature sensor
- 139 DS-HD-KV4 high-pressure sensor
- 140 TV-NG1 tank shutoff valve
- 141 PR-NG1 pressure-control module

- 144 Ignition systems over the years**
 - 144 Overview
 - 146 Early ignition evolution
 - 154 Battery ignition systems over the years
- 160 Inductive ignition system**
 - 160 Design
 - 161 Function and method of operation
 - 163 Ignition parameters
 - 167 Voltage distribution
 - 168 Ignition driver stage
 - 169 Connecting devices and interference-suppressors
- 170 Ignition coils**
 - 170 Function
 - 171 Requirements
 - 172 Design and method of operation
 - 178 Types
 - 182 Ignition-coil electronics
 - 183 Electrical parameters
 - 185 Simulation-based development of ignition coils
- 186 Spark plugs**
 - 186 Function
 - 187 Usage
 - 188 Requirements
 - 189 Design
 - 192 Electrode materials
 - 193 Spark-plug concepts
 - 194 Electrode gap
 - 195 Spark position
 - 196 Spark-plug heat range
 - 198 Adaptation of spark plugs
 - 202 Spark-plug performance
 - 204 Types
 - 211 Spark-plug type designations
 - 212 Manufacture of spark plugs
 - 214 Simulation-based spark-plug development
 - 215 Handling spark plugs
- 220 Motronic systems**
 - 220 Open- and closed-loop electronic control
 - 226 Motronic versions
 - 232 System structure
 - 234 Subsystems and main functions
- 242 Sensors**
 - 242 Automotive applications
 - 243 Temperature sensors
 - 244 Engine-speed sensors
 - 246 Hall-effect phase sensors
 - 248 Hot-film air-mass meter
 - 251 Piezoelectric knock sensors
 - 252 Micromechanical pressure sensors
 - 254 High-pressure sensors
 - 256 Two-step lambda oxygen sensors
 - 260 LSU4 planar broad-band lambda oxygen sensor
- 262 Electronic control unit (ECU)**
 - 262 Operating conditions
 - 262 Design
 - 262 Data processing
- 268 Exhaust emissions**
 - 268 Combustion of the air/fuel mixture
 - 269 Main constituents of exhaust gas
 - 270 Pollutants
 - 272 Factors affecting untreated emissions
- 276 Catalytic emission control**
 - 276 Overview
 - 277 Three-way catalytic converter
 - 280 NO_x accumulator-type catalytic converter
 - 282 Catalytic-converter configurations
 - 284 Catalytic-converter heating
 - 288 Lambda control loop

292 Emissions-control legislation	Background information
292 Overview	51 History of compressor-engine automobiles
294 CARB legislation	59 The story of fuel injection
297 EPA legislation	143 Real-world fuel economy
299 EU legislation	153 Magneto ignition applications
302 Japanese legislation	166 Danger of accident
302 US test cycles	201 100 years of spark plugs – product variety
304 European test cycle	225 Motronic systems in motorsport
305 Japanese test cycles	247 Miniaturization
306 Exhaust-gas measuring techniques	255 Micromechanics
306 Exhaust-gas test for type approval	267 Performance of electronic control units
308 Exhaust-gas analyzers	271 Greenhouse effect
311 Evaporative-emissions test	287 Catalysis
312 Diagnosis	291 Ozone and smog
312 Monitoring during vehicle operation (on-board diagnosis)	331 Global service
315 On-board diagnosis system for passenger cars and light-duty trucks	
332 Diagnosis in the workshop	
334 ECU development	
334 Hardware development	
338 Function development	
340 Software development	
344 Application-related adaptation	
351 Quality management	
352 Index of technical terms	
352 Technical terms	
358 Abbreviations
